PROFILE

Senior Full Stack Developer with 5 years of experience developing scalable web applications using Node.js, TypeScript, React/Next.js, Python and AWS. Holds a Master's degree in Cybersecurity from Federation University Australia with strong focus on secure system design, API performance optimization, and cloud-native deployments aligned with OWASP and GDPR best practices.

Work Rights: Legally authorized to work in Australia (full work rights).

WORK EXPERIENCE

Software Engineer, NeST Digital Pvt Ltd

June 2022 - May 2023

- Contributed to the design and development of HRMS applications supporting internal organizational operations.
- Developed scalable front-end and back-end components using Angular and Spring Boot.
- Analyzed system issues and implemented enhancements based on functional and technical requirements.
- Supported the setup of CI pipelines and performed developer-level testing to improve software quality.
- Assisted in application vulnerability assessments during development to identify potential security weaknesses.
- Applied secure coding practices aligned with OWASP principles to reduce risks such as injection attacks and session vulnerabilities.

Software Engineer, Coddle Technologies Pvt Ltd

March 2019 - March 2022

- Contributed to the development of multiple mobile and web applications across various industries.
- Developed end-to-end mobile applications using React Native and Node.js.
- Collaborated with cross-functional teams on requirements gathering, UI/UX design, and data integration.
- Optimized application performance and supported implementation of SEO features.
- Implemented secure authentication mechanisms and secure API integrations to protect application data.

Associate Software Developer, Aavana Corporate Solutions Pvt Ltd

February 2018 - March 2019

- Contributed to the development of internal tax computation software with customized modules for business operations.
- Maintained existing systems and implemented new application features and enhancements.
- Performed unit testing and prepared technical documentation to support system maintenance and development.
- Developed backend functionality using PHP Laravel and MySQL.
- Supported application security and database integrity by applying secure database practices and validating data inputs.

EDUCATION

Master of Applied Cyber Security - 6.62

Federation University

June 2023 - July 2025

- Developed expertise in information security, networking security, and cloud/mobile security, focusing on secure system architecture, threat mitigation, and protection of digital assets.

SKILLS

Programming Languages:

Python, JavaScript (ES6+), TypeScript, PHP

Frontend: React.js, Next.js, Angular, HTML5, CSS3

Backend: Node.js,

Express.js, Java Spring

Boot, RESTful APIs,

Microservices

Databases: PostgreSQL,

MySQL (Schema

Design, Indexing, Query

Optimization)

Cloud & DevOps-

: AWS (ECS, Lambda,

S3, CloudWatch), Docker,

CI/CD (GitHub Actions,

GitLab, Jenkins)

Testing: Jest, Postman, Unit

& Integration Testing

Security: OWASP Practices,

JWT Authentication,

GDPR & ISO 27001

Principles

Tools & Workflow-

: Agile/Scrum, Jira, Figma,

Git Collaboration

Cybersecurity: Vulnerability

Scanning (Nmap,

Nessus, OpenVAS),

Network Traffic Analysis

(Wireshark), Web

Application Security, Email

& Phishing Threat

Analysis, Incident Response

Fundamentals.

Security Practices: OWASP

Secure Coding, JWT

Authentication, Secure API

Development, GDPR &

ISO 27001 Principles

CERTIFICATIONS

Oracle Academy – Database Design and Programming with SQL

- Gained foundational knowledge in SQL, relational database design, data querying, and database management concepts.

Master of Computer Application - 76%

Amal Jyothi College of Engineering (MG University)

August 2015 - November 2017

- Developed strong foundations in software development, data structures, database management, and web technologies, building scalable applications using modern programming practices.

BSc Computer Science - 79%

Assumption College, India (MG University)

June 2012 - May 2015

- Built foundational knowledge in computer programming, operating systems, networking, and database management.

PROJECTS

HRMS Web Application – NeST Digital

June 2022 - May 2023

- Delivered end-to-end full-stack features including UI development, API integrations, and database workflows within Agile sprint cycles.
- Developed responsive, role-based dashboards that improved internal workflow visibility and operational efficiency.
- Implemented CI/CD automation pipelines, reducing manual deployment effort and release time by approximately 30%.

Kincrew Mobile & Web Application – USA

June 2021 - March 2022

- Contributed to the development of a co-parenting collaboration platform designed to help parents manage schedules, communication, and financial responsibilities after separation.
- Developed mobile features using React Native and TypeScript and web components using React.js, integrating backend APIs built with Node.js.
- Implemented UI data integration with backend services and supported requirement analysis, feature development, and maintenance to improve application functionality.

EdgeProp Property Portal – Malaysia

Feb 2020 - March 2021

- Contributed to the development of an online property platform providing market analytics, property listings, and financial calculators using React.js for the web application.
- Developed mobile application features using React Native, integrating backend services built with Node.js and MySQL, and connected multiple APIs for property data services.
- Participated in system design discussions and requirement analysis to enhance platform functionality and improve overall user experience.

Madinah Web Platform – Bahrain

Mar 2018 - May 2018

- Developed backend modules using Laravel (PHP) and MySQL with role-based user management.
- Implemented content management features and file management functionality for media handling.
- Collaborated on requirement gathering and system architecture implementation.
